

Marina Batlló Rius

Applied AI Engineer | GenAI & Machine Learning | Data & AI Pipelines

marinabatllo7@gmail.com | +34 677247057 | Barcelona, Spain

PROFILE Applied AI professional with a strong background in machine learning, biomedical AI, and end-to-end data pipeline development. Experienced in building automated ETL workflows, developing ML models for classification and biomarker discovery, and designing data-driven software products that accelerate experimental throughput. MSc in Human-Computer Interaction, combining AI engineering with product and UX design to build scalable tools with strong user adoption. Currently working in consulting delivering AI-driven analytics solutions for multinational clients.

EMPLOYMENT HISTORY

- Feb-2025 - Present

Data Scientist Consultant, GLOBALPRAXIS
 - Delivered AI-driven analytics to support strategic decision-making for multinational clients (Bimbo, Danone, Suntory).
 - Built internal automation tools that doubled audit efficiency by improving data workflows.
 - Applied machine learning techniques to identify operational drivers, generate insights and improve performance tracking.
 - Collaborated with consultants and stakeholders to translate business needs into deliverables.
- Feb 2023- Feb 2025

Data manager & UX designer, VITALA
 - Designed and implemented a complete Data Management Plan, including data governance, cybersecurity principles, ETL workflows and traceability.
 - Developed a data analysis software product that delivered results 4x faster, including UX research and interface design to ensure adoption.
 - Developed ML algorithms for carcinogenic biomarker detection and toxicity prediction.
 - Led a process redesign initiative that increased experimental throughput by 8x, enabling faster iteration and model validation.
- Nov 2023- Jun 2023

AI Developer & Researcher, Nerf, IMEC
 - Built and kept a data pipeline for brain imaging datasets to support ML model development.
 - Developed a classification model for pain detection in rats achieving 90%+ accuracy.
 - Conducted model performance evaluation, dataset refinement and iterative experimentation to improve predictive robustness.
 - Contributed to scientific research outputs and publications in the brain imaging field.
- Jan 2021- Feb 2023

Computational Researcher, UIC Barcelona
 - Designed computational models for an electronic nose system applied to healthcare use cases.
 - Analyzed large experimental datasets and created visuals to communicate findings.
 - Developed predictive models for wine differentiation with 95%+ accuracy.

EDUCATION

- Sep 2021- Jun 2023

MSc in Human Computer Interaction, Utrecht University

Graduated with honours in Advanced psychology and Recommender systems
- Sep 2017- Jun 2021

Bioengineering, International University of Catalonia

Scholarship for academic success, top 3 of the class.
Graduated with honours in: Programming, Ethics, 3D printing and Bioprinting, Bussiness and Society and Biomaterials
- Sep 2023-Present

Hisotry, Geography and Art History, Open University of Catalonia

Honours in Art History

SKILLS

- End-to-End Project Delivery

• Cross-functional Team Collaboration

• Data Pipelines & Reporting

• Process Automation & Efficiency Improvement

• Internal Tool / Product Development

• Data Governance & Compliance (cybersecurity, traceability)

LANGUAGES

- Spanish

Native
- Catalan

Native
- English

Highly proficient

COURSES

- Full stack Engineer

CodeAcademy, Jan 2023-Jan 2024
- Top Rosies AI

UPC, Sep 2021-Jun 2022
- Excel Expert Certificate

CepiBase, Feb 2019-Sep 2019
